International Politics and World Order

Introduction

During the past century the world has witnessed a massive and critical transformation in the character of the International Political System – as a result of two devastating World Wars, the dissolution of the colonial empires, and a technological revolution of unprecedented proportions.

Understanding the International Political System could be regarded as the supreme challenge for the modern citizen. The present international system acts as a formula for the co-existence of dissimilar peoples with the minimum of disorder in the whole and the maximum of local independence.

This collection offers a unique and comprehensive introduction to the systems and politics of current international politics and the established world order. It recalls previous systems of International Relations and examines the historical origins and social changes that made the twentieth century an age of global violence and political agitation.

The collection concerns itself with the nature and aims of political interaction between nation states, how this is conducted, and details the rules and regulations therein. It provides a lucid and insightful account of the changing institution, organisations and political/diplomatic processes that dominate present World Politics.
